

Wiresolution kit.

A complete package solution for hanging, commuting of fittings, busbars, etc.

Suitable for all types of roofing.

The wire is threaded through the wire snap lock, (see Figure 2) that you can easily adjust the height. The kit also included a relief tile that threading the wire through. Then you drill a 5mm hole where the wire will hang and threading the wire with unloading the washer through the hole, to unloading the washer should lie against the surface and prevent the wire from going through the hole.

Can be easily suspended from the ventilation pipes, beams, concrete ceiling or similar roofing solutions.

This solution can be loaded up to 15 kg.

Wiresolution kit contains:

1. 1st Wiregripper with quick release (SKB12).
2. 1st 1,2 mm x 4 m with endstop.
3. 1st Relife plate.
4. 1st wirelock 3,0 mm.
5. 1st concrete clips (drill 8 mm).
